**FLAT PLATE CONCEALED PENDENT**

**DESCRIPTION AND OPERATION**

The Globe Quick Response Series GL-QR/DRY/INCH Dry Type Adjustable Concealed Pendent Sprinkler is designed for use in special applications such as freezing environments and conditions where sediment or foreign materials might accumulate in ordinary drop nipples. All that is seen at the ceiling is a 3 5/16" diameter ceiling plate color finished to match the specifier's exact requirements. The Quick Response Series GL-QR/DRY/INCH Dry Adjustable Concealed Sprinkler may be virtually invisible as it does not interrupt the "smooth flow" of the ceiling. The quick response sprinkler with operation approximately six times faster than ordinary sprinklers, should be used advisedly and under the direction of approving authorities having jurisdiction. Globe's Dry Adjustable Concealed Sprinkler utilizes its frangible 3mm glass bulb type sprinkler which is located above the ceiling and concealed from view by the ceiling plate. The plate is soldered to the sprinkler special upper support assembly in three places. Upon the application of sufficient heat, the plate falls to the floor exposing the pendent spray sprinkler. At the ampule's rated temperature, the sprinkler opens releasing the bulb seat, causing the inner tube assembly to move allowing the spring assembly to pivot alongside the inner tube. At this time, water flows through the sprinkler and is distributed by the deflector in an approved discharge pattern.

The provided protective cap needs to be removed in order to install the sprinkler with the proper wrench. The protective cap must be replaced on the sprinkler until the time the cover plate is to be installed. The "push on - screw off" designed cover plate is easily installed and with a nominal 1" inch of adjustment makes it easier to get a proper fit at the ceiling.

**TECHNICAL DATA**

- See reverse side for Approvals and Specifications.
- Temperature Ratings -
  - 135°F (57°C) Sprinkler, 135°F (57°C) Cover Plate
  - 155°F (68°C) Sprinkler; 135°F (57°C) Cover Plate
  - 175°F (79°C) Sprinkler; 155°F (68°C) Cover Plate
  - 200°F (93°C) Sprinkler; 155°F (68°C) Cover Plate
- Water Working Pressure Rating - 175 psi (12 Bars)
- Factory tested hydrostatically to 500 psi (34 Bars)
- Maximum low temperature glass bulb rating is -67°F (-55°C)
- Frame - bronze • Deflector - brass • Screw brass • Bulb Seat - brass
- Spring - nickel alloy • Seal - teflon • Retainer - brass • Pin - stainless steel
- Torsion Spring - stainless steel • Lodgement Wire - stainless steel
- Bulb - glass with alcohol based solution, 3mm size • Orifice Insert - brass
- 1"NPT • Outer Tube - galvanized steel pipe • Inner Tube - stainless steel
- Cover Plate - brass • Upper Escutcheon Assembly - plated steel

## IMPORTANT INSTALLATION DATA

Globe GL Series Dry Concealed sprinklers should be installed in accordance with the requirements set forth in NFPA 13. These sprinklers are to be installed using a pipe wrench applied to the outer tube. When this is not possible, the proper sprinkler head wrench may be used with extreme care for lengths up to approximately 18". Excessive force may distort the frame thus destroying the unit.

When installed in a wet system extending into a freezing area see chart on Dry Caution sheet for minimum exposed barrel length to prevent ice plugs. Please refer to our Dry Caution Sheet for further important installation data.

## ORDERING INFORMATION SPECIFY

- Quantity • SIN • Style • Orifice • Temperature
- Finishes desired • Quantity - Wrenches - P/N 337014
- Quantity - Protective Caps - P/N 332868
- "A" Dimension - Distance from face of fitting to finished ceiling.

## GLOBE® PRODUCT WARRANTY

Globe agrees to repair or replace any of its own manufactured products found to be defective in material or workmanship for a period of one year from date of shipment.

For specific details of our warranty please refer to Price List Terms and Conditions of Sale (Our Price List).
